

Jie Huang

Lecturer, School of Smart Governance, Renmin University of China

September 2025-present

huangjie2018@ruc.edu.cn · jiehuang-smartgov.github.io

Education and Visiting Research

2020-2025	Ph.D., Information Resource Management Renmin University of China. Advisor: Prof. Xiaomi An.
2023-2024	CSC-sponsored visiting scholar Center for Technology in Government, University at Albany, SUNY.
2018-2020	M.A., Information Resource Management Renmin University of China. Advisor: Prof. Xiaomi An.
2014-2018	B.A., Archival Science Business School, Nankai University. Advisor: Prof. Fang Wang.

Research Interests

Public Data Governance and Cross-Department Collaboration

Semantic Interoperability and Standardization Governance

Smart City Data Use and Evaluation

Data Governance for AI Applications

Memory Governance for LLM Agents

Teaching

Fundamentals of Artificial Intelligence and Data Technologies (Undergraduate)

Data Management and Data Mining (Undergraduate)

Data Management and Data Governance (Master's)

Academic Norms and Thesis Writing (Master's)

Research Projects

Principal Investigator

Cross-department Public Data Semantic Interoperability and Collaborative Governance Mechanisms for Smart Governance

Principal Investigator; Project No. 26XNN021. Renmin University of China, "Biaoyuan" Special Project.

Current Project Participation

Data Governance for Large Models and Multimodal Technologies

Commissioned research project; major participant; March 2026-present.

Interdisciplinary Research Group on Digital Intelligence and Ethics

RUC U40 Research Fund; major participant; January 2026-present.

Selected Earlier Participation

Research on Government Data Governance and Data Use Capability in China

Major Project, National Social Science Fund of China, No. 20&ZD161; major participant; December 2020-December 2025.

International standards development and application demonstration for urban data use

Sub-project of "International Standards Development for Data Elements: Foundations and Key Technologies", National Key R&D Program of China; major participant; October 2022-September 2025.

Challenges and Responses of Records Management in Structured Data Environments

Science and Technology Project, National Archives Administration; participant; April 2023-March 2025.

International Standards Research on Key Technologies for Advanced Computing and Other Digital Infrastructure, Phase I

National Key R&D Program of China; sub-project participant; December 2021-November 2024.

Public Data Authorization and Operation Mechanisms and Scheme Design

National Natural Science Foundation of China; participant; January-December 2023.

Development of Local Public Data Standards for Taizhou

Commissioned research and standardization project; participant; December 2022-January 2023.

Development and Application of a Standardized Collaborative Management System for Government Big Data Governance and Comprehensive Utilization

Major Scientific Research Fund Project, RUC, No. 21XNL019; major participant; January 2021-December 2023.

Standardization Work**Registered expert, ISO/IEC JTC 1/WG 11 on Smart Cities, since December 2022.**

Contributions include project secretarial and editorial work, document drafting, and international workshop organization.

ISO/IEC Standards and Projects**ISO/IEC 25005-1:2026** Data use in smart cities - Part 1: Framework

Major participant; third editor. International Standard; published July 2026.

ISO/IEC TR 25005-2:2025 Data use in smart cities - Part 2: Use case analysis and common considerations

Major participant; third editor. Technical Report; published October 2025.

ISO/IEC DTS 25005-3 Data use in smart cities - Part 3: Measurement, evaluation and reporting

Major participant; second editor. Draft Technical Specification; approval phase.

ISO/IEC AWI TR 25005-4 Data use in smart cities - Part 4: Case studies of special considerations for AI applications

Participant. Technical Report project; under development.

ISO/IEC AWI 26605-1 Smart city vocabulary, taxonomy, terminology and ontology - Part 1: Concepts and relationships

Participant. Approved Work Item; under development.

ITU-T FG-MV Deliverables**ITU FGMV-33** Glossary for metaverse

Main drafter and editor; second author. Technical Specification approved June 2024; prepublished version available.

ITU FGMV-21 Principles for building concepts and definitions related to metaverse

Main drafter and editor; third author. Technical Report approved and published December 2023.

National Standards and Projects**Lead drafter: City-wide digital transformation - Assessment indicators system of data effective use**

Plan No. 20255953-T-907; under approval.

Drafter: City-wide digital transformation - Maturity model

Plan No. 20213294-T-469; under approval.

Drafter of the following published national standards:

GB/T 43245-2023 Data exchange and sharing for smart city infrastructure

GB/T 42458-2023 Evaluation of effective data use in public health emergencies in smart cities

GB/T 26163.2-2023 Metadata for records management: conceptual and implementation issues

Local Standards

Contributing drafter of the following 2022 editions of local public data standards in Taizhou:

DB3310/T 90-2022 Public data security and trustworthiness

Withdrawn October 2025.

DB3310/T 91-2022 Public data collection

Withdrawn October 2025.

DB3310/T 92-2022 Evaluation of data use in informatization projects

In force.

DB3310/T 93-2022 Authorized operation of public data

Superseded by DB3310/T 93-2024.

Chinese national and local standard titles above are descriptive English renderings.

Official records and current status (checked 7 October 2026)

Publications

13 journal articles; 1 published conference paper; 2 conference research contributions; 3 book contributions.

Journal Articles

Conference Papers and Research Contributions

[14] **Jie Huang** (2024). Developing a good governance framework for AI data governance in smart cities: a literature review.

Research design accepted at the Public Management Research Conference (PMRC), Seattle.

Research design accepted at PMRC 2024; first author.

[15] **Jie Huang**, Xiaomi An (2021). A components framework conception for big data governance rules.

Paper presented at iConference 2021, Chinese Papers Track (online).

In Chinese; presented at iConference 2021; first author; Best Chinese Paper Award.

Conference report

[16] Lili Wang, Xiaomi An, Jicang Xu, **Jie Huang**, Mingjun Guo, Jufang Hu (2020). Collaborative Innovation Community Capacity Building for Electronic Records Security Management.

Proceedings of the 17th International Conference on Intellectual Capital, Knowledge Management & Organisational Learning ICICKM 2020, pp. 391-399. Academic Conferences International Limited.

In English; EI; co-author.

Publication record

Book Contributions

[17] Xiaomi An, et al. (2023). *Frontiers in Big Data Governance: Theory and Practice*. China Renmin University Press, Beijing. ISBN 9787300321660.

In Chinese; English title translated from Chinese; Jie Huang contributed to this book.

[18] Hong Mei (Ed.) (2022). *Pathways to Data Governance: The Guizhou Experience*. China Renmin University Press, Beijing. ISBN 9787300303871.

In Chinese; English title translated from Chinese; edited by Hong Mei; Jie Huang contributed to this book.

[19] Hong Mei (Ed.) (2022). *Methods of Data Governance*.

China Renmin University Press, Beijing. ISBN 9787300303888.

In Chinese; English title translated from Chinese; edited by Hong Mei; Jie Huang contributed to this book.

Awards and Honors

2024 Second Prize, RUC Outstanding Research Achievement Award (2023 award cycle).

2022 Special Academic Excellence Scholarship, Renmin University of China.

2021 Outstanding Paper Award, China Society for Scientific and Technical Information Annual Conference and Forum on Information Science and Information Work Development.

2021 Best Chinese Paper Award, iConference 2021.

2021 Merit Student, Renmin University of China.

2017 Best Research Proposal, International Summer School on Information Research Methodology, School of Information Management, Sun Yat-sen University.

2015, 2017 Gongneng Scholarship, Nankai University.

2016 Comprehensive Second-class Scholarship, Nankai University.

Academic and Professional Service

Registered expert, ITU-T; secretarial and editorial contributions to projects on metaverse terminology, AI-native systems, and smart cities.

Research Assistant, Smart City Research Center, Renmin University of China.

Academic service for the Journal of Library and Information Science in Agriculture.

Earlier teaching service: teaching assistant for the graduate course Big Data Analysis and Applications.
